Welcome to our brand New Catalogue for 2020.

Loved and experienced by clients
since early 2008.

Welcome to Vannin Healthcare Catalogue

Dear reader,

Vannin Healthcare Global (VHG) offers an unconditional commitment to the Global Healthcare Systems.

The COVID-19 pandemic has evolved into something we never expected.

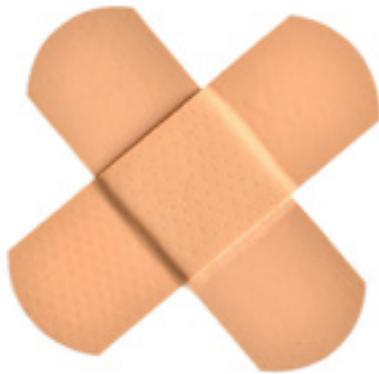

VHG was set up years ago off the back of my corporate life directing Toshiba, Philips, and Viasys Healthcare Inc. to name a few. We pride ourselves on our 'out of the box thinking' and ability to meet client requests with enthusiasm, passion, and most of all with solutions that continue to provide overwhelmingly outstanding results.

As a company, my son is now deeply involved and shares the same enthusiasm as I do. Sometimes it takes years of pushing innovative healthcare solutions. We now see ourselves at the forefront of medical technology which we are bringing to the market.

**Innovative solutions
for high quality care.**

Because Health is the real Wealth.

A sidekick to our healthcare heroes, our clinical users.

On a personal note, may I add along with everyone else at VHG that I am working hard to manage all the complications involved with this crisis. We will be with you every step of the way. Like most of you, I also have a family to worry about. I am a passionate VHG colleague, but also a father and a husband.

At times like these, the worry list can be long for all of us. There are no exceptions. However, I am also convinced that we will win the COVID19 battle and implement a new foundation of care and health technologies the world is waiting for.

Thank you for looking into our company. We look forward to serving you with our excellent products and service. Please remember we are not brokers. We are a top level clinical and medical device company that manages everything from A to Z, from manufacturing to logistics. This is precisely what separates us from 'the pack'.

With my best regards,

Peter van Veen
CEO

OUR QUALITY OBLIGATION

Health care is specific in the sense that if something goes wrong it could mean losing a life you were trying to save. Because we know how much is at stake we don't tolerate mistakes.

When choosing manufacturers we make sure their products were thoroughly tested and certified by proper regulatory bodies. By supplying from reliable manufacturers and rigorously checking the orders, we ensure every product you order is of top-notch quality.

About us

Building trust by supplying quality

Everybody at Vannin Healthcare Global is committed to delivering impeccable service. By constantly looking for new and innovative solutions, we aim to completely optimise the sales process and make certain you have a positive experience. Every member of our dedicated team works relentlessly to ensure our clients are satisfied.

As a company that supplies medical equipment globally, we are well prepared to provide wholesale supply worldwide. We are determined to considerably alleviate the current PPE shortage caused by the COVID-19

Why us

Superb Product Quality

At Vannin Healthcare Global we choose manufacturers to work with based on a strict set of requirements. We do so to ensure superior product quality and make sure you're getting your money's worth every step of the way.

Excellent Service

Tired of ordering equipment only to be unpleasantly surprised when it arrives? Unclear descriptions, lack of transparency – we know how frustrating it can be. That's why we're committed to providing an excellent service. We don't stop with sales. The pre-sales and after-sales experiences are equally important

Reasonable Prices

Aware of the current economic situation in the world, we've set our prices accordingly. We know quality healthcare products are a prerequisite to helping people in medical settings, so our main goal is offering affordable solutions to medical professionals everywhere.

Fully Certified Products

Our products are compliant with all the relevant standards and demands of medical regulatory authorities. We pride ourselves in our offering of certified products, especially because the number of unreliable suppliers is on the rise. Ensure workplace safety by choosing from our CE, ISO, EN and FDA certified selection of

How to order easily.

With over 12 years of experience and numerous successful enterprises, we have become a chosen supplier of many institutions around the world, like the NHS, the Belgian, Peruvian, Austrian, and Romanian governments. We regularly supply medical equipment to over 3000 hospitals and clinics worldwide. That wouldn't be possible without our Easy Order policy.

Product Highlights

We know that choosing the right supplier is not an easy task. Apart from easy ordering, products must be of the highest quality. Our policy isn't to fulfil large one-time orders and then lose the confidence of our buyers. We form long-term relationships that are based on mutual respect and satisfaction. Our commitment to product quality and customer care is second to none.

That is why with Vannin Healthcare Global, what you order is exactly what you get – and more. Feel free to browse through our healthcare and PPE product selection and choose the best fit for you today!

High End Quality

Durability

Wide Variety

Different Price Ranges

3ply Non-Medical Face Mask

Our non-medical 3ply masks provide ample protection from airborne particles such as dust, pollen, fibres, automobile exhaust, and other. Being lightweight and breathable makes our civil masks ideal for every occasion.

3ply Type I Face Mask

With three protective layers, our Type I surgical masks are a crucial ally in both day-to-day activities and professional settings. You can wear them at airports, on construction sites, in restaurants, nail salons, or while cleaning.

3ply Type II Face Mask

Meeting all of the European standard's requirements (EN14683:2005), our 3-ply medical Type II masks provide significant protection against airborne particulate matter. Go about your day without worrying about inhaling pollutants.

3ply Type IIR Face Mask

A disposable medical face mask suitable for surgeries and various health care procedures. Our surgical Type IIR masks provide ample protection against bodily fluids and airborne particulate matter (viruses, bacteria, dust, pollen, soot, and other).

KN95 Non-Medical

KN95 is a non-medical respirator mask specifically designed to protect you from non-oily pollutants. The KN95's high fit effectiveness and adjustable nose clip make for a significantly more comfortable wear compared to other generic respirator masks.

KN95 Medical Mask

Despite being commonly referred to as dust masks or pollution masks, KN95 respirators are so much more. Providing exemplary protection from even the tiniest of particulates (diameter of less than 0.3 microns), they are an invaluable asset in the fight against COVID-19.

FFP2 Respirator Mask

Our FFP2 respirator masks are compliant with all relevant European standards and as such have the filtration efficiency of at least 94%. Available with or without a valve, cupped or folded, they are the recommended part of PPE for medical personnel.

FFP3 Respirator Mask

With a filtration efficacy of PM2.5 $\geq 99\%$ and PM0.3 $\geq 99\%$, our FFP3 respirator masks were specifically designed to offer nearly perfect protection from infectious agents and pollutants. Available with or without a valve, cupped or folded.

N95 Niosh Respirator

Providing exemplary protection from even the tiniest of particulates (PM2.5 $\geq 99\%$ and PM0.3 $\geq 95\%$) this NIOSH-approved standard respirator mask is an invaluable asset in the fight against COVID-19. Available in two designs (cupped or folded), its universal dimensions are a comfortable fit for medical use.

Face Shield

A protective barrier to shield your face for low risk to high risk medical procedures and situations. Face shields are a recommended part of the PPE, protecting your mouth, nose, and tear ducts from potential airborne contaminants.

Foot Covers

Disposable shoe coverings for medical and everyday use. Made from stretchable material to fit almost all sizes, these disposable foot covers make it easy to keep the floors clean and disinfected.

Surgical Cap

Surgical caps are a necessity in any hospital, clinic, operating room, or food industry. By wearing our caps, you will keep the environment sterile and your patients safe. The soft lightweight material of our surgical caps will lessen your fatigue during long business hours and prevent bacterial contamination.

Medical Apron

Disposable surgical aprons for use in operating rooms, hospitals, laboratories, and clinics in general. The lightweight material is comfortable to wear, especially during complicated procedures when the focus needs to be on the patient.

Hand Sanitiser

Protect yourself and those around you with our unique certified blend of hand sanitisers capable of destroying up to 99.99% of viruses. Suitable for any hospital, clinic, store, school, office, or workplace, it is the first line of defence against COVID-19 and other infectious diseases.

Hand Sanitiser Wipes

Convenient and easy to use disinfectant hand wipes that preserve hand hygiene. A great alternative when handwashing isn't possible, these wipes are designed to address all hand hygiene needs, removing soil from the hands and leaving them clean and protected.

New.

High Quality

Great Support

Fast Delivery

Durable

Nitrile Gloves

Our nitrile examination gloves are unrivalled in terms of durability and protection. While shielding your hands from various chemical exposures, they are the gloves with the highest penetration resistance to viruses and bacteria. Maintain a high level of dexterity and protect your skin with our disposable nitrile gloves.

Comfortable

Latex Gloves

Durable latex examination gloves that fit like a second skin! The most commonly used gloves in hospitals and clinics, latex gloves are made to be extremely soft and comfortable. In addition to providing exemplary protection from many chemical hazards and infectious agents, they are also completely biodegradable.

Nitrile Gloves

Nitrile examination gloves are the best of both worlds when it comes to gloves – a Vinyl/Nitrile hybrid. The comfort of Vinyl gloves and the movability of Nitrile gloves are perfectly combined in our nitrile gloves to offer you a convenient alternative for any lower-risk

Vinyl Gloves

Vinyl gloves are the go-to gloves of service industry and manufacturing industry workers everywhere. The cost-effective choice when it comes to glove selection, choose vinyl gloves when you're working with non-hazardous materials.

AAMI Level 1 Gown

Our AAMI low level medical gowns are ideal during standard patient care where you don't need more than minimal protection.

Made with durable CPE material, they are the breathable shield you need when the risk of coming into contact with blood and fluids is low. Perfectly sized for your comfort and ease, our gowns come with a variety of features to make sure you don't feel encumbered by their presence. With strong seams and elastic knitted cuffs, these AAMI Level 1 gowns cover all critical zones, providing sufficient protection in low-risk situations.

AAMI Level 2 Gown

The low to medium level of protection that AAMI level 2 medical gowns provide is sufficient for occasions where the risk of exposure to fluids is low but still present.

Remain fully functional during your patient care by using our AAMI level 2 protective gowns for simple surgical interventions. Made from lightweight and breathable material, they allow you to maintain freedom of movement while doing what you do best – caring for your patients. Available gown materials: PP+PE or SMS.

AAMI Level 3 Gown

The medium level of protection provided by our AAMI Level 3 surgical gowns is well-suited for moderate risk situations.

This type of medical gown can withstand more exposure to fluids than the Level 2 AAMI gowns, including the larger amounts of blood splatter. Ease the strain that comes with endless hours of patient care and seemingly never-ending shifts that many medical professionals have to deal with by wearing our PPE. Manufactured with durability in mind, the Vannin Healthcare sterile gowns will keep you comfortable and protected. Available gown materials: PP+PE or SMS.

AAMI Level 4 Gown

The high level of protection for which our AAMI Level 4 surgical gowns are known is perfect for highly risky situations.

High level protection is intended for a variety of surgical procedures where there's a considerable fluid penetration risk, usually due to unpredictable blood splatters, droplets, or aerosols. This means that our Level 4 gowns are suitable when the risk of contracting viruses and other infectious pathogens is significant. The Level 4 gowns have to pass three tests to prove their barrier protection performance is adequate, and all our gowns passed them with flying colours! Available gown materials: PP+PE or SMS.

A top-selling item for COVID-19 screening

NEW Large-Scale Body temperature measurement solution

The temperature Kiosk allows hands-free check-in and prior to entering a main facility. VHG turnkey temperature screening solution offers the convenience of automated, non-contact skin temperature measurement with an easy-to-understand pass/fail system.

- Thermal Sensitivity < 0.05 °C
- Measurement Distance: 2 m ~ 8 m
- Hospitals, Office Buildings, Airports and others can measure Body or Surface temperature

Digital Oral Thermometer

Our Digital Oral Thermometer is a quick and reliable tool for taking temperature. Suitable for both adults and children, it is conveniently designed for easy carrying and handling. Its flexible tip is made from eco-friendly silicone which feels soft and snug against the skin.

- easy to read
- easy to clean
- fast results (up to a minute)
- flexible and waterproof tip

Digital Thermometer

Gauge temperatures from a safe distance in the blink of an eye with our Medical Infrared thermometer. Made from nonporous plastic, they are easy to sanitise and keep clean. Suitable for any business, our digital thermometers are widely used in hospitals, malls, airports, offices, government institutions, and other public places.

- near-instant measuring (≈1 second)
- can memorise up to 32 measurements
- can measure in °C or °F
- can measure Body or Surface temperature

Suits: Category III Type 5

We offer durable Category 3 suits to protect you against hazardous particles. Our Type 5 suits are fully compliant with EN 13982, and will keep you properly protected from the influence of contaminated particulates.

They come with elastic cuffs, hood, and waistband for a closer but also snug fit.

- abrasion-resistant
 - offers reliable protection against hazardous contaminants
 - unisex
 - surprisingly comfortable
 - EN 13982
-

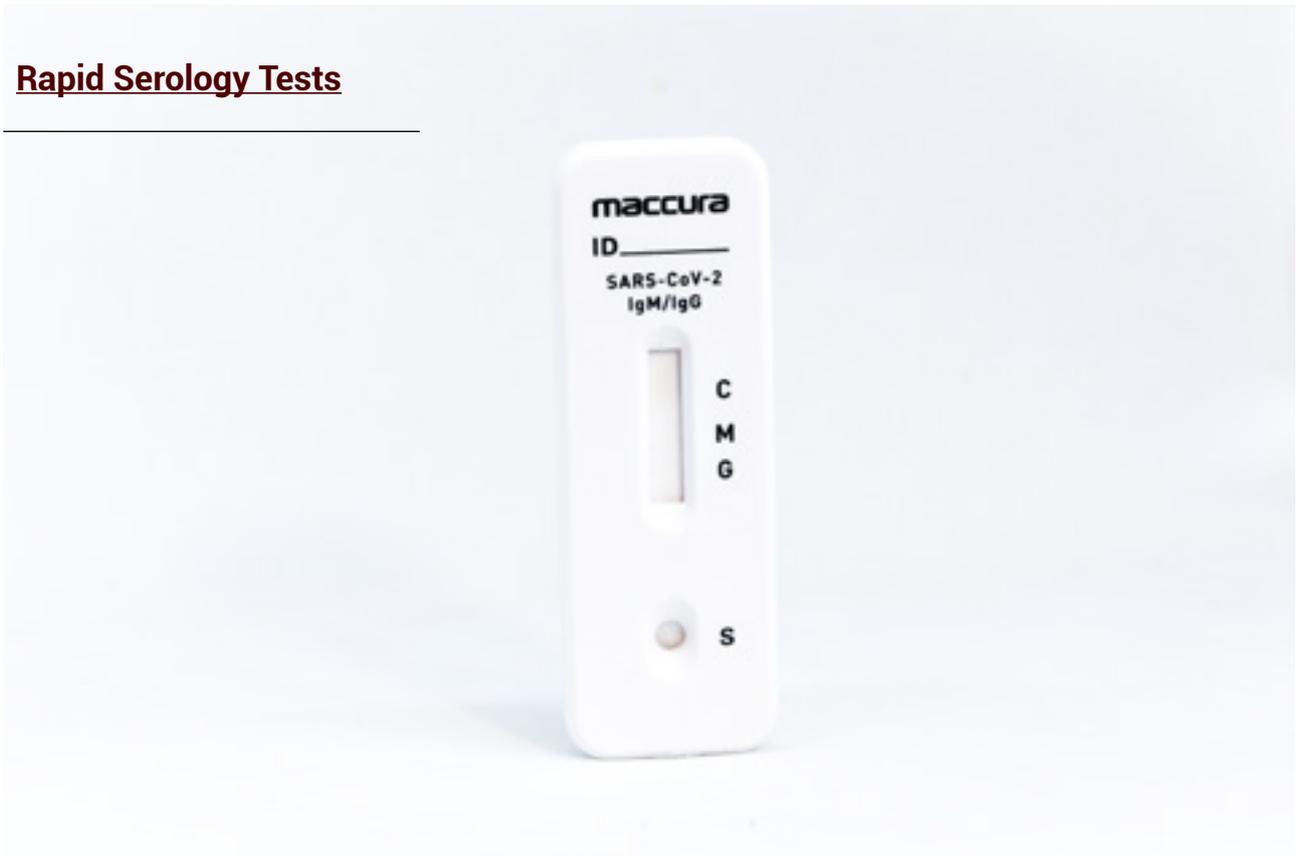

Suits: Category III Type 6b

Our Category 3 Type 6b suits are designed to shield you from potentially harmful splashes and biologically contaminated particles. Being certified for hazardous situations, they have passed all the necessary testing to ensure the highest quality of protection against liquids with lower degrees of toxicity.

- applicable in a large number of settings
 - extremely durable
 - protects against liquid splatters and aerosols
 - EN 13034 and EN 14126
-

Test Kits

Rapid Serology Tests

The presence of antibodies could indicate a past infection. After fighting a coronavirus, our bodies are likely to produce two classes of antibodies: IgM and IgG. VHG offers serology tests that check for both:

- SGTi-flex COVID-19 IgM/IgG (25 tests per kit)
- STANDARD™ Q COVID-19 IgM/IgG Duo Test (40 tests per kit)
- Anti-SARS-CoV-2 Rapid Test (50 tests per kit)

The test design makes it a perfect choice for remote areas without access to fully-equipped laboratories. Simply obtain a blood sample from a patient, and add 10µl into the appropriate place on the testing cassette along with three drops (90µl) of the buffer. A recent study in Malaysia shows 100% sensitivity. Results in 10-15 minutes.

Product Highlights

Extremely Fast Results

Convenient

Easy to Interpret

Point-of-care Testing

Viral PCR Tests

Viral (or swab) tests are used to determine whether viral genetic material is present in a sample obtained from a patient. Vannin Healthcare offers several effective COVID-19 swab tests:

- GeneFinder™ COVID-19 Plus RealAmp Kit
- SARS-CoV-2 Fluorescent PCR
- DiaPlexQ Novel Coronavirus (2019-nCoV) Detection Kit
- STANDARD™ M nCoV Real-Time Detection Kit

Our COVID-19 PCR Test Kits combine two Polymerase chain reaction (PCR) techniques – Real-time PCR (RT-PCR) and Reverse PCR (qPCR). The techniques are joined for a better and more accurate in-depth analysis of the viral RNA. Depending on the Test Kit, different viral genes are targeted. This is how we ensure the maximum reliability of our tests.

Product Highlights

Exceptionally Reliable

Multi-gene Detection

≥95% sensitivity

≥99% selectivity

Ventilators

Vannin Healthcare Global offers a wide variety of mechanical ventilators. All of them are highly adjustable and have at least one independent power supply source (in most cases an internal battery). All ICU ventilators come with a CPAP and BIPAP mode.

YH-830

Adaptable for both hospital and home use, the YH-830 Bi-level ventilation device was specifically designed for the treatment of respiratory conditions such as the sleep apnea-hypopnea

Anesthesia-Ventilation unit

ACM812A

Its unique inspiratory pause option minimises the risk of viral spread by allowing elimination of possibly infectious phlegm.

Comes with a unique inspiratory pause option that allows elimination of possibly infectious phlegm and minimises the

Evita V300

The Evita V300 is a model famous for its high ventilation quality.

Famous for its high ventilation quality, the V300 can compensate for leaks and artificial airway resistance regardless of whether the ventilation is invasive or not.

Biyevent

With its rapid response time measured in milliseconds and automatic calibration it is a worthwhile investment for any hospital.

Evita Infinity V500

The Evita Infinity V500 ventilation device is equipped with a sophisticated automated leak compensation system.

Highly adaptable, the V500 is able to quickly pinpoint and efficiently resolve any leakage by adjusting inspiratory trigger and

Savina 300 Classic

The user-friendly interface and intuitive operating system has been fully optimised in our Savina 300 Classic which is why most technicians easily adapt to everything this ventilation device has to offer.

With a fully optimised user-friendly interface and intuitive operating system, most technicians easily adapt to everything this ventilation device has to offer.

Eternity SH300

The Eternity SH300 ventilation device has a 10.4" TFT LCD display with flexible configuration that readily shows flow waveforms and respiratory curves.

IMAGING & RADIOLOGY

CT Scanner

Our CT Scanners will provide you with high quality images and allow you to focus your efforts on excellent patient care instead.

They are specifically designed to offer remarkably consistent results. Being easy to navigate and configure, our CT Scanners offer a unique positive experience for both the clinician and the patient. Many of its features are focused on the patient's needs and take into consideration their physique and pathology, such as COVID-19.

- VHG offers in Hospital and Mobile "IN A BOX" CT Scanners.

- All can be complemented with our IT (PACS) and TeleMed options.

DR Mammography

Get crystal clear images and make your patients feel at ease with our specialised mammography

- Economical
 - DICOM 3.0 Compatible
 - VHG PACS and AI Auto Cancer detection is optional
 - Ideal for Rural Areas
-

DR Flat panel Universal Xray

Fully adjustable and with dependable performance, our X-ray machines will make sure your diagnoses are on point.

- Economical
 - DICOM 3.0 Compatible
 - VHG PACS is optional
 - Ideal for Rural Areas
-

DR Wireless Mobile Flat panel Xray

Easily set up our DR Flat panel X-ray machines anywhere without having to settle for low quality images.

- Economical
 - DICOM 3.0 Compatible
 - VHG PACS is optional
 - Ideal for Rural Areas
-

Patient Monitors

Product with Features and Applicability

Vannin Healthcare Global offers a comprehensive selection of patient monitors for continuous monitoring of a patient's vital signs. Our patient monitors come with a user-friendly interface in high resolution and allow intuitive configuration.

Most of our monitors are conveniently sized to enable you to bring quality healthcare everywhere. Their exceptional portability is only second to their optimised performance which was additionally enhanced with long battery life and wide applicability. Get reliable measurements and easily decide on the optimal treatment for your patients

Quick response for optimum performance

Patience is a virtue but your patients come first.

In all medical settings, being able to quickly respond is often a matter of life or death. That's why all our monitors were optimised to take up as little of your patient time as possible.

You can be certain the unit will continue to monitor your patient's vitals until you safely reach the hospital due to its long battery life (up to 4 hours of active use). The simple configuration allows you to intuitively operate your monitor, and its large screen allows better visibility for every member of your team. The unit is sufficiently lightweight, making it portable enough for you to easily reach any needed location.

Products | Patient Monitors

Optimised performance enhanced with long battery life and wide applicability.
